- Complementary Add-On Modules:
 - Configurable Business Rules Module
 - Universal Carrier Module
 - Billing & Reporting Module

AUTOMATE MULTI-CARRIER SHIPPING PROCESSES WHILE REDUCING SHIPPING COSTS AND CYCLE TIMES

Kewill Flagship is an enterprise class multi-carrier shipping management system that supports complex, high volume, multiple locations, and international and domestic shipping. Designed from the ground-up to support black box or attended ship stations in complex distribution environments, the solution is used by thousands of companies every day, including large omni-channel retailers and global manufacturers.

By automating mission-critical processes for parcel and LTL shipping, Kewill Flagship enables superior cost management, cycle time reductions and faster, more reliable deliveries to customers, meeting the needs of the most demanding shippers. You can further streamline your workflow by integrating the solution with an existing ERP, CRM, TMS, WMS, and MHS or other host application.

Part of the Kewill MOVE[®] supply chain platform, Kewill Flagship can be deployed to suit your business, either Cloud or on-premises. With a typically fast implementation, your solution is up and running quickly, accelerating the delivery of business benefits and return on investment.

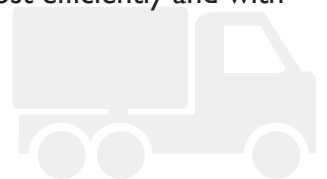

KEWILL FLAGSHIP KEY BENEFITS

- Accelerates fulfillment by producing packing slips and carrier labels in one seamless workflow and capturing/ validating lot/serial no's, saving labor costs and improving customer service
- Offers a simplified process for updating LTL tariff information and the ability to rate shop across parcel and LTL carriers, ensuring best option always selected
- Provides full carrier compliance, including compliance labeling, rating, reporting, and electronic manifesting for both domestic and international origin carriers, enabling flexibility and choice
- Enables you to maintain control and visibility of shipments as they move throughout your global supply chain
- Gives ability to quote an accurate shipping cost at order entry or during the customer's website experience
- Improves customer service by identifying and resolving issues before they become a problem
- Enforces corporate shipping policies and rates across multiple locations
- Allows you to ship to international customers more cost effectively and reliably using one centralized solution, reducing the cost of your global supply chain with international origin shipping
- Minimizes risk of international shipments with global trade compliance features

Kewill Flagship enables you to satisfy the needs of your domestic and international shipments, whether you are shipping low volumes of business-critical packages to business customers, or fulfilling the requirements of a high-volume omni-channel retail business. Fully scalable, it allows you to flexibly expand or contract your shipping operation to meet the demands of your business, and your customers. The demonstrated scalability of this solution enables the management of over 2,000 shipping stations from a single deployment – or over 250,000 shipments from a single facility. Over 2 million packages are shipped through Kewill software every day.

Kewill Flagship supports the broadest set of carriers in the industry serving both domestic and international requirements, and provides export documentation and compliance checks for all international shipments, supporting even the most sophisticated business rules (e.g. break bulk, advance rate shipping and multi-leg zone skipping).

Used by thousands of companies every day, Kewill Flagship automates mission-critical processes for parcel and LTL shipping - enabling superior cost management, cycle time reductions and faster, more reliable deliveries to customers, accelerating the critical last mile. It provides you with the confidence that no matter where shipments are destined, or where they originate, your shipments will be delivered on time, cost efficiently and with minimal interruption.

ABOUT KEWILL

If your supply chain stops moving, your business stops moving. The Kewill MOVE[®] platform keeps your supply chain in motion while providing visibility and proactive event management across the most critical logistics functions – trade, transport, store, comply, manage, integrate.

Kewill can help you address your most frustrating logistics and multimodal transportation challenges, from cost pressures to network volatility to compliance, with a single software platform.

Create strategic advantage through more agile supply chain execution – **contact Kewill today.**
